

## Natural Selection Promotional Banner

---

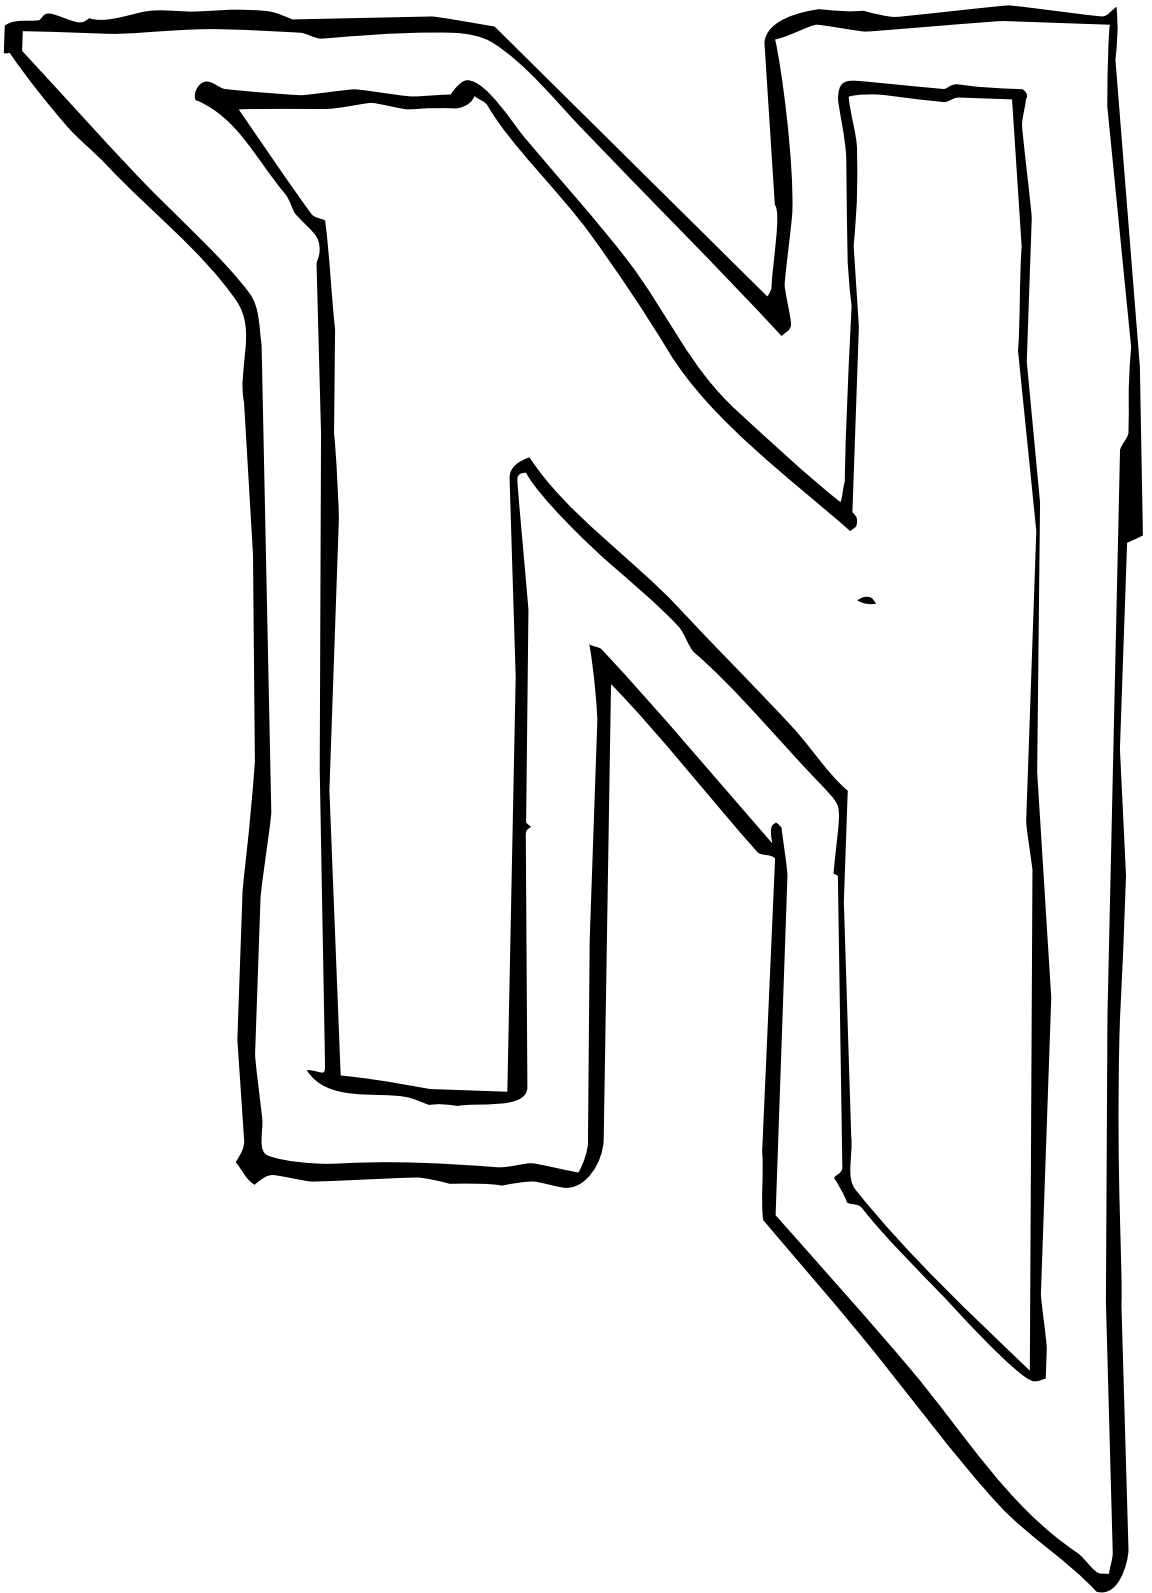

**You Will Need:** Someone else's printer  
A piece of string, 4 metres long  
Colouring and decorating supplies  
A stapler  
Somewhere to hang your banner

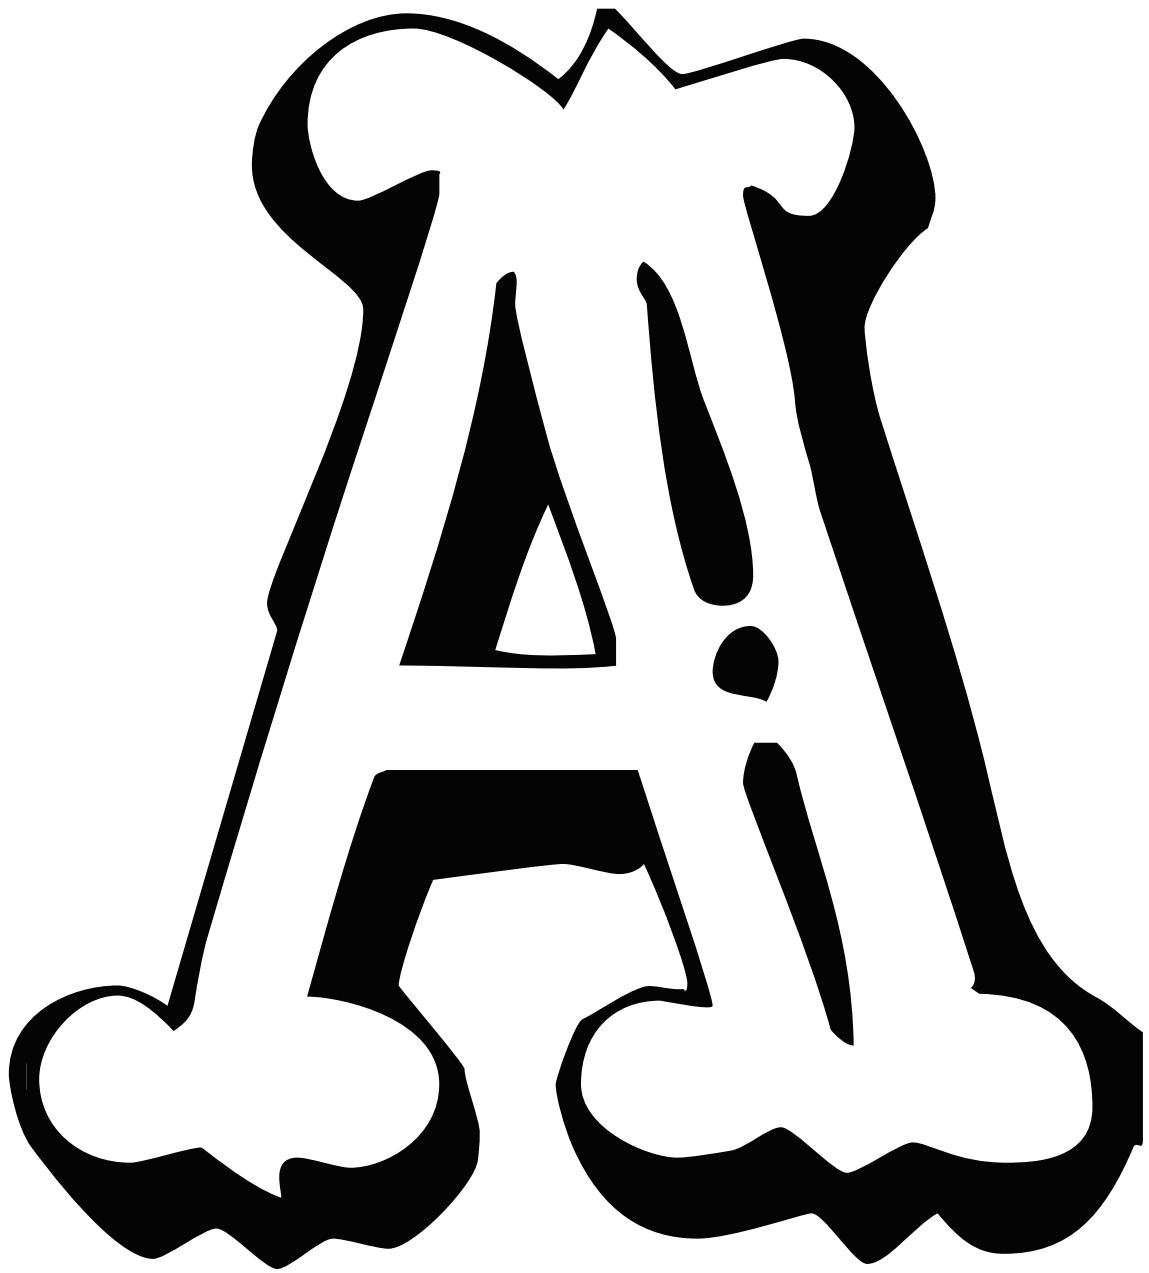

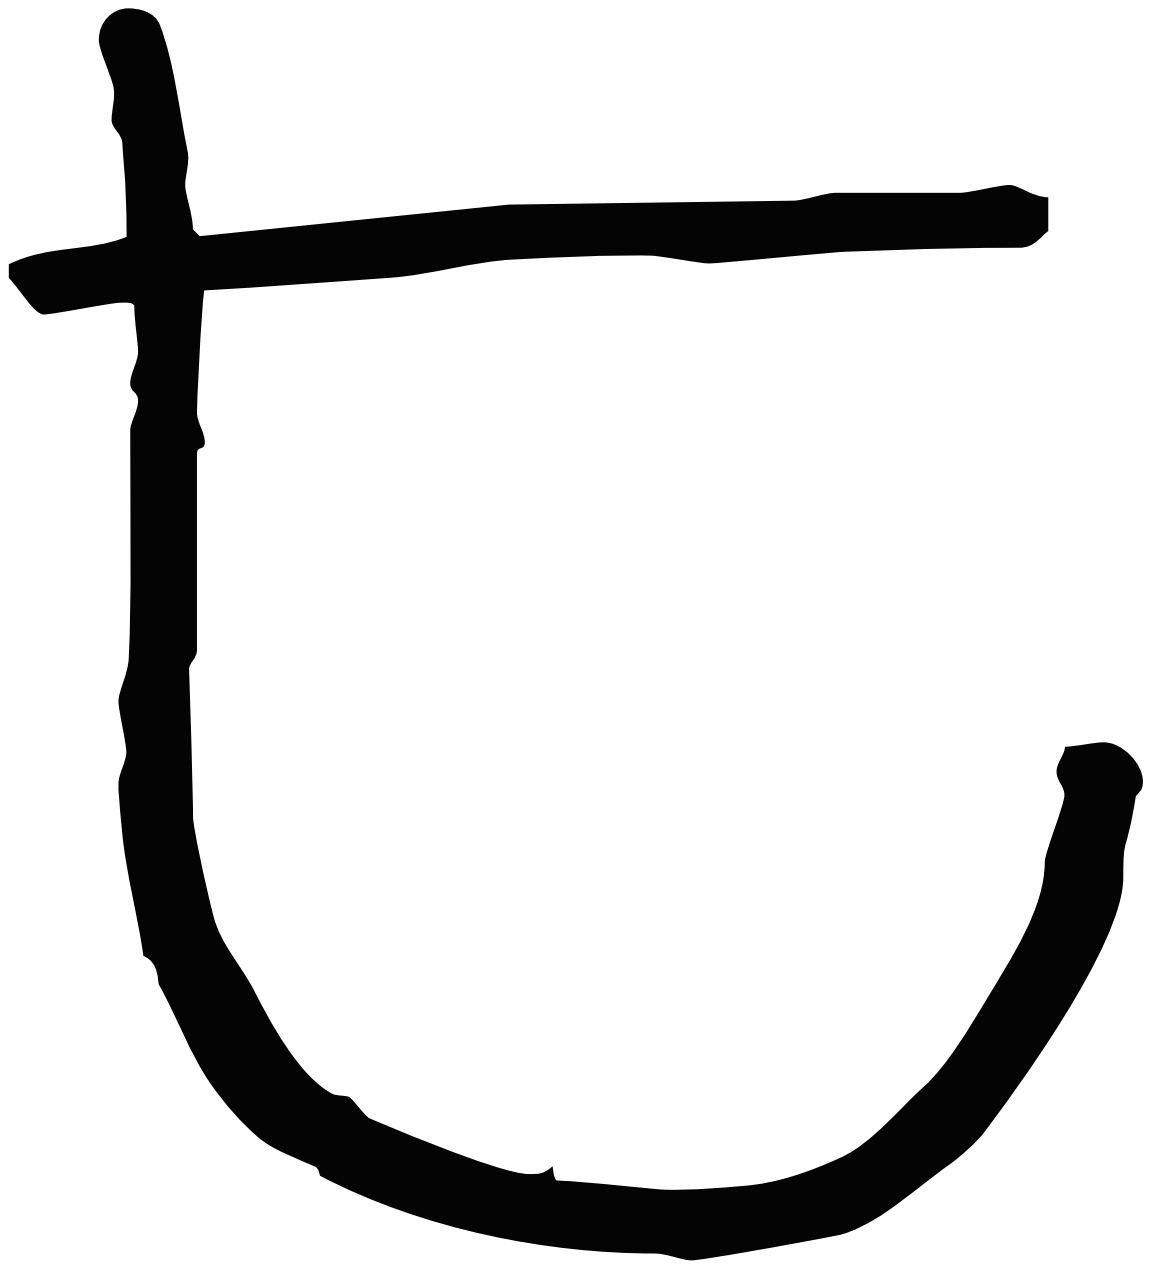

1. Using someone else's printer print out this banner file. If you plan on making a double-sided banner you will need to print out two copies of the banner file.
2. Colour-in or otherwise decorate each page.
3. Staple the top of each page to the piece of string. Make sure the letters are in the right order, unless you want to experiment with anagrams. If you are making a double-sided banner staple the two pages together with the string, making sure that the letters are facing out on each side.

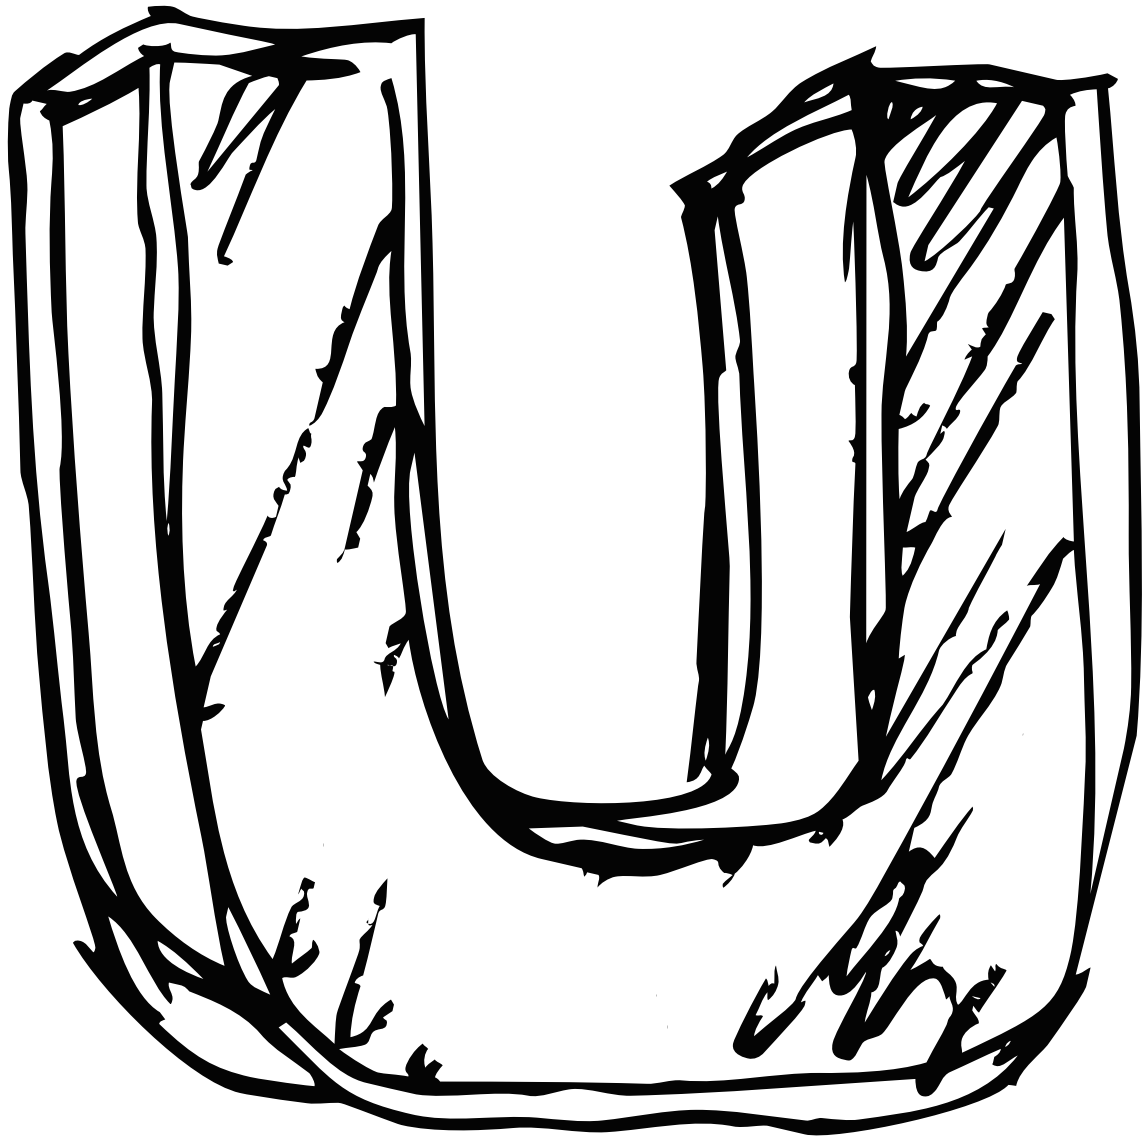

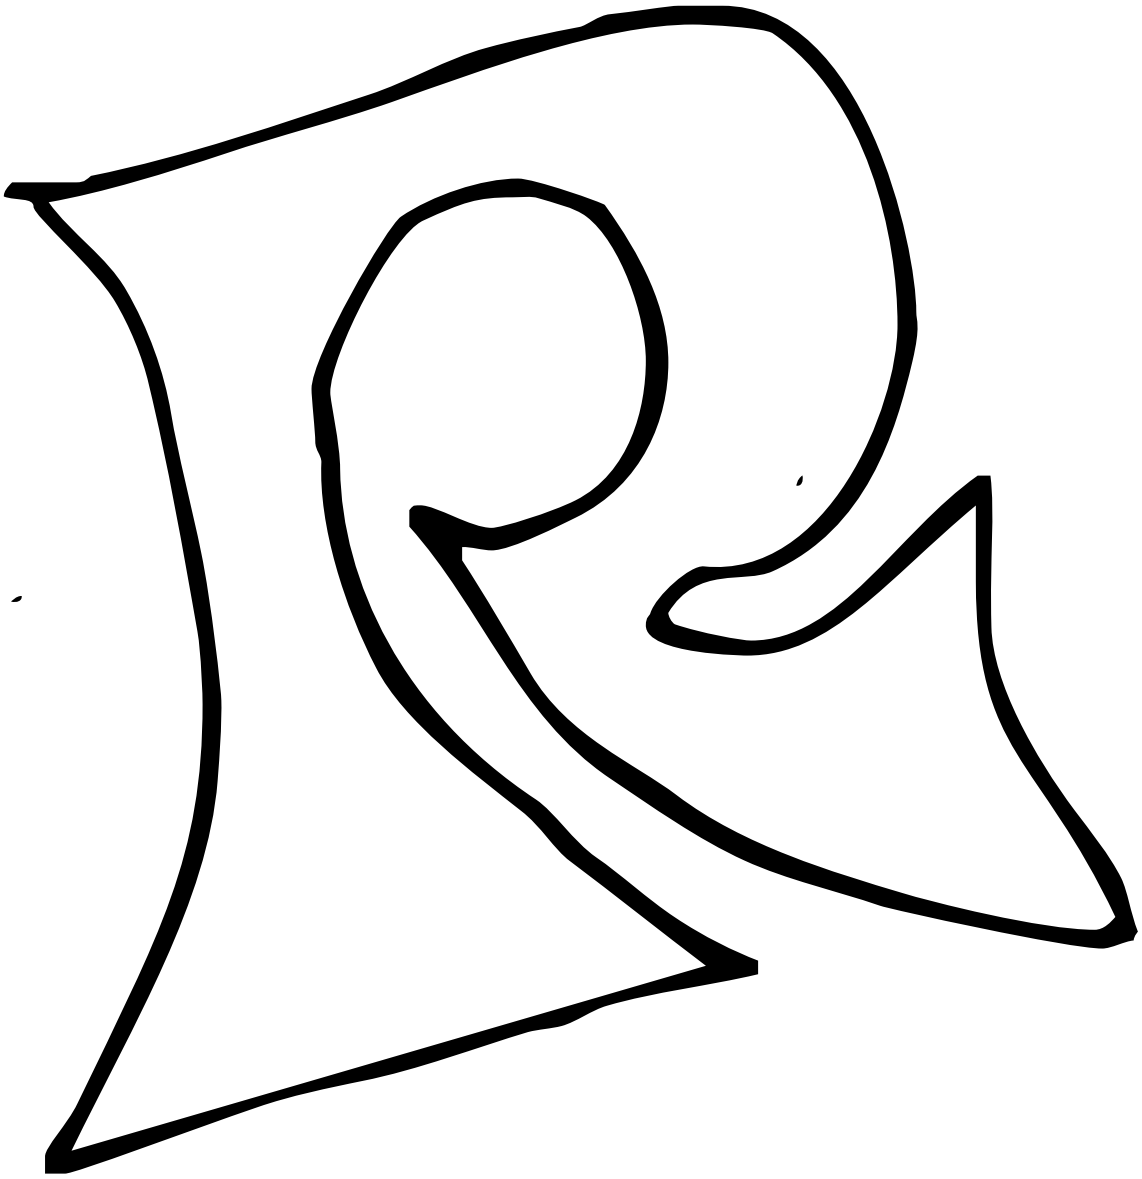

4. Find a good spot and hang your banner.
  5. Sit back and enjoy the mighty publicity that is your Natural Selection Promotional Banner.
